All of us at Green Fuse® Botanicals would like to welcome you to our 2020/2021 offerings. As we move into our second decade of breeding we are proud to offer you our largest introductory year ever. We remain committed to our focus of delivering pioneering genetics to our growing partners. Green Fuse® Botanicals owns and operates Calico™ Genetics, our internal breeding company as well as a liaison to our global network of breeding partners. Calico™ Genetics strives to not only deliver revolutionary genus to the marketplace, but to orient all breeding to the ultimate goal of grower solutions.

We are proud to offer sixty five new varieties, consisting of five completely new series for the 2020/2021 season. Many of these new introductions are industry first and fully realize our goal of customer advantage breeding. The First ever Game Changer® Hydrangea will save months of production time due as no cooling is required for flowering. The Rudbeckia Dakota™ series redefines the class as the first ever zone hardy hirta combined with day length neutrality.

We at Green Fuse® Botanicals remain driven to deliver breeding breakthroughs to the horticultural community, but it is the cultivation of our grower relations that remains our passion. It is your trust and support of the program that strengthens our dedication. We wish our partnership to bring you success this season and many seasons to come.
Lifestyle Plants™ is our selection of plants designed for the changing life-style needs of our customers. Lifestyle Plants™ can be grown for outdoor seasonal color or as indoor house plants. Year round availability brings all new options for seasonal programs. There are no boundaries to where we can bring color into our lives!

The breeding goal of the Green Fuse® Botanicals Optimum™ Annuals program is to deliver uniformity within each series for ease of production. Each color in each series will perform uniformly regardless of geography. The earliness to flower allows delivery any time of year.

The First Light® Perennial program contains first year flowering varieties that require no cold treatment (vernalization) to flower and are day length neutral. The goal of First Light Perennials® is to offer perennials that can be programmed to flower as you would annual selections. Schedule these selections to meet a desired week instead of waiting for the traditional photoperiod. This will not only remove many weeks of crop time allowing for additional rotations, but also dramatically saves on labor as the crops are able to always be fresh.

This collection of perennials exhibits extremely unique attributes that validate their inclusion into the Green Fuse® Botanicals perennial program. While they do require vernalization and/or long days, their flower intensity ensures excellent sell through.
BEGONIA SHADOW KING®

The Green Fuse® Shadow King® series has small leaves and is heavily branched, making them the perfect fit for smaller containers and combinations. The uniformity within the series ensures predictable scheduling and shipping. The complete, textural color selection will enhance any retail bench. Finished height will be 8” to 12”.

**BEGONIA REX BEWITCHED™**

The strong upright growth and incredible leaf structure on the Bewitched™ series is just plain spooky! Noted for their cut leaf, the crisp colors, with deep veins is a must have for any Begonia Rex program. Finish times are blazing fast, just like the Dibs®, due to their aggressive growth pattern.

A yearlong sales window, with such an excellent habit, it’s just plain scary! Finished height of 12” to 18”.

**Varieties:**
- Cherry
- Pink
- Red Black
- Silver
- White
- Wintergreen
- Lavender

**Lifestyle PLANTS**
BEGONIA REX DIBS®
Begonia Dibs® are spectacular! Unsurpassed vigor and basal branching make Begonia Dibs® a completely new breeding portfolio for Rex Begonia. Best suited for containers 6” and up, the Dibs® crush traditional rex timing standards. Perfectly suited for holiday sales as well as spring color pots. Finished height will be 12” to 18”.

BEGONIA REX CURLY™
The all new Curly™ series delivers the traditional “snail” type leaf formation on a reimagined plant habit. This strong vigor series allows growers to finish with consistency never before seen on the classic leaf type. The color intensity will easily be a favorite at the retail level. Finished height of 12” to 18”.

FIRST LOOK
ECHEVERIA CORAL REEF®
It’s a simple process to see the attributes of the Coral Reef® series as the name clearly defines the plant. Strongly pronounced ruffled foliage bring contrast and interest that demands consumers to reach out and touch. A true Lifestyle™ plant, Coral Reef® positions itself perfectly indoors or out. Height is 5” to 10”.

STREPTOCARPUS LADYSLIPPERS®
Ladyslippers®, a Green Fuse® Lifestyle Plant™, will perform with a burst of continuous blooms indoors near a window or in shady areas out of doors. An ideal mixed shade container could include Ladyslippers® with other components such as Shadow King® Begonia, Fuchsia Windchimes® and other shade tolerant plants. Finished height is 6” to 10”.

- Dark Chocolate
- Aqua
- Chocolate
- Pink
- Red
- Deep Blue Vein
- Grape Ice
- Red BiColor
- Strawberry Ice
- White Ice
- Yellow Blue Eye
- Yellow Pink Cap
**ANIGOZANTHOS JOEJOE®**
Anigozanthos JoeJoe® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. JoeJoe® works great in quarts through gallons. They will finish quickly easily allowing multiple turns in a season. Finished height is 12” to 15”.

**ANIGOZANTHOS KANGA®**
Anigozanthos Kanga® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. Kanga® is geared for quick turn gallon production. They will finish quickly easily allowing multiple turns in a season. Finished height is 17” to 20”.

**Height Comparison**
- **JOEJOE®**: 12-15”
- **KANGA®**: 17-20”
- **JUMP®**: 24-36”
- **BIG ROO®**: 48-60”

**Colors**
- Orange
- Red
- Yellow
- Cherry
- Orange
- Red
- Yellow
- Burgundy
- Pink
ANIGOZANTHOS JUMP®
Anigozanthos Jump® are excellent in landscapes and for large containers. Jump® are larger growing plants with excellent disease resistance and drought tolerance. Hummingbirds find the brightly colored tubular flowers of these Anigozanthos irresistible. Finished height is 24” to 36”.

ANIGOZANTHOS BIG ROO®
Anigozanthos Big Roo® are excellent in landscapes and for large containers. Big Roo® are the largest Anigozanthos we carry. They feature excellent disease resistance and drought tolerance, and hummingbirds love them! Finished height is 48” to 60”.
**BIDENS DOUBLOON™**
Doubloon™ puts on a show of gold in the garden that lasts the entire summer. Doubloon's™ compact size plays well for perfect containers without the need for growth regulators. Their large yellow flowers are a perfect highlight for mixed planters. Finished height is 4” to 6”.

**CALIBRACHOA CRUZE® CONTROL**
Calibrachoa Cruze® Control series boast enormous flowers and a more “controlled” habit than other calibrachoa. Plants have shorter internodes producing more branching for a beautifully full container. Cruze® Control are among the earliest of all to flower, so they are perfect for any part of the world. Mature height is 6” to 10”.

**CLEOME CLEMENTINE™**
The combination of daylength neutrality and superior basal branching gives the Clementine™ series easy container fill in both small and large containers. Geared for the hottest environments, Clementine™ will throw massive blooms all season long. Mature height is 24” to 30”.

**EUPHORBIA CRYSTAL™ WHITE**
Euphorbia Crystal™ White flowers non-stop and is a great impact plant with its sparkling white blossoms. Their incredible branching structure produces near perfect small pots. This Euphorbia is the perfect drought and heat tolerant component plant for mixed containers and hanging baskets. Mature height is 8” to 12”.

Blush  Pink  Violet
FUCHSIA WINDCHIMES® BASKET

The Windchimes® Baskets flower under short days and continue to perform as high summer temperatures approach. They are perfect for all sizes of baskets and great for mixed containers, too. Their tight internode structure equates to higher density production and shipping. Huge flowers are reminiscent of older style fuchsia, but still deliver the uniformity of new breeding. Finishing height is 8” to 14”.

NEW
FUCHSIA WINDCHIMES® UPRIGHT

The Windchimes® Upright are sturdy enough to hold their upright habit while loaded with massive blooms, making them perfect for pot crops and combinations. They will flower in short days to hit the market extremely early. An excellent choice for the elusive shade combination. Finished height is 10” to 16”.
IPOMOEA SWEET GEORGIA®

The all NEW Ipomoea Sweet Georgia® series is a heavily branched series with a completely uniform, compact habit and proven performance. Their combination friendly habit extends their use easily into mixed containers. The Sweet Georgia® series includes selections with both palmate and heart shaped leaf forms, as well as the variegated selections of Green Splash and Purple Splash. Mature height is 4” to 6”.

Black Maple  Bronze  Deep Purple  Green Splash  Heart Purple  Heart Red  Light Green  Purple Splash
LOBELIA OCEANIS®
Lobelia Oceanis is a heat tolerant series with exciting "break-through" colors like our Lavender and Pink. All four Oceanis varieties flower so heavily that they create sensational mixed baskets and can also be used in containers and landscapes as featured stand-alone plants. Mature height is 4" to 7".

LOBULARIA MARINELAND®
Marineland® varieties will take the spring chill and the summer heat and flower abundantly, from top to bottom. Their well-behaved habit makes them perfect for season long combinations. The sub classification of the Frosty series combines both bright foliage contrast and deep flower highlights. Finished height is 3" to 5".
**NEMESIA MOMENTO®**

Momento® are compact, making them ideal for 4” or quart production. Customers love the sweet fragrance of Momento®, growers love their ability to initiate flowers under higher night temperatures. Expect early spring flowers that continue with their unique summer performance. Mature height is 6” to 8”.

![Nemesis Momento Colors](image)

**PURSLANE HOT SHOT®**

Hot Shot® are very early and have eye catching, large flowers. Their strong self-branching eliminates multiple pinches to create full baskets. Rose Flambeau is a must grow in your Purslane assortment. With its variegated foliage of lime, pink and cream in combination with bright pink flowers it looks outstanding alone or in a mixed container. Mature height is 4” to 6”.

![Purslane Hot Shot Colors](image)
Every garden bed needs a Blanket® Petunia to keep it covered with beautiful colors through the most extreme summer conditions. Blanket® Petunias are also great in containers that grow to dramatic proportions throughout summer. The ideal quick crop petunia to allow multiple turns within the season, even with just one plant per basket. Their milliflora flowers require near zero maintenance for the consumer; even the doubles are excellent at self-cleaning. Plants will reach 6” to 8” in height with an impressive 36” spread.
PETUNIA GOOD AND PLENTY®

Good and Plenty® varieties flower early, even when grown in the shortest of days. But what really makes Good and Plenty® a “must grow” choice for growers is their near perfect habit. Plants wrap containers in bouquets of flowers. Predictable finishing allows for perfect containers and combinations. Garden height is 8” to 10”.

First Light® Perennial Compatibles® can be scheduled and finished just like annual mixes. No more worrying about forcing varieties out of season or planning for special cold requirements or vernalizations. The First Light® Perennial Compatibles® are completely programmable, since all our components are completely day length neutral and require zero cooling. These mixes shine brightly for early spring sales, through the summer heat and are a great companion crop to break the mundanity of fall mum programs.
AGASTACHE SUNRISE™
Sunrise™ Agastache flower continuously from early spring until autumn frost. This series was bred for color intensity and strong branching. Sunrise™ offer great heat and drought tolerance. Perfect in both perennial and annual mixed containers. Agastache Sunrise™ are among the greatest of all pollinator plants. A must have for all perennial programs. Garden height is 18” to 24”. Zone 5
BUDDLEJA LEAH™
Massive flowering spikes on this daylength neutral series clearly shine for year round sales. The all new Raspberry intensifies this three color series. Strong basal branching on these compact selections allows for sales in containers as small as a quart in full flower. The series’ uniformity can translate into stunning three color mixes. Garden height 20” to 24”. Zone 5

COREOPSIS REINA™ GOLD
The all NEW Reina™ is clearly regal in its performance. With extremely large semi-double blossoms, Reina™ looks easily at home in a perennial garden or in a mixed combination. Daylength neutrality allows year long sales with an extremely quick finish time. Garden height is 12” to 15”. Zone 5
DELOSPERMA DELMARA™

Massive, brightly colored blossoms in combination with rock solid hardiness demand series attention. The strong branching on a mounding habit translates to flowers all over the plant and not just the tips. The all new Pink Halo accelerates sales on this six color series. Delmara™ has proven garden performance from the deep south to the western mountain ranges. Garden spread is 18” to 24”. Zone 4

DIANTHUS CONSTANT BEAUTY®

Constant Beauty® flower “constantly” even in the warmest summer conditions. These beauties have double flowers and delightfully subtle fragrance. Strong landscape performance and full color range make these a standard for all dianthus programs. The Constant Beauty® Crush selections dazzle with their delicious bicolor blossoms. Mixed containers are only limited by your imagination as they will all perform exactly the same. Garden height is 6” to 10”. Zone 4
DIANTHUS CONSTANT CADENCE®

Dianthus Cadence are another easy to program First Light Perennials® from Green Fuse®. This uniform series of fully double flowers deliver a pot carnation look with landscape vigor. Both Milk Cherry and Peach Milk give combination color as the flowers go through many shades as they harden. Garden height is 6” to 8”. Zone 4
DIANTHUS CONSTANT PROMISE™

This series of a Chinensis x Barbados is landscape and zone hardy. It promises to bring season long color on extra-large blooms that sit neatly on top of the foliage. Constantly the first dianthus to come into color and the last to go out of color. Like all Green Fuse® Botanicals dianthus, its neutrality and zero vernalization requirements make scheduling a snap. Garden height is 10” to 12”. Zone 4
**GAillardia Lunar®**

Gaillardia Lunar® are sturdy garden performers even in the most arid of climates. Their massive flowers are early to bloom and sit tightly on top of their well-rounded habit. Tightly packed internodes have strong resistance to splitting as the flowers develop. They are excellent in our Perennial Compatibles® mixes. Garden height is 6” to 10”. Zone 5

**Gaura Bantam®**

Gaura Bantam® have compact flower stems and a mounded plant shape. Bantam® will flower easily under short days, hitting the early spring market. Bantam® Iris Pink will delight all consumers with its striking variegation and deep rose blossoms. Garden height is 10” to 14”. Zone 5
Green Fuse® is extremely proud to bring another industry first to the market, the Hydrangea Game Changer® series. The first and only hydrangea in the world to not only be daylength neutral, but the Game Changer® series requires zero chilling! This removes 24 to 30 weeks of production time. The massive lace-cap flowers will bloom continuously from spring through frost. The remarkable hardiness will make this a standard in perennial gardens throughout the world! Garden height is 20” to 24”. Zone 5
LAVENDER DENTATA PARIS® BLUE
Paris® Blue boasts an incredibly heavy branched habit, easily setting itself apart from the traditional Dentata. This bred habit allows for three to four times the blooms, while behaving perfectly in high density container production. Garden height is 12” to 15”. Zone 7

LAVENDER STOECHAS LAVISH®
The Lavish® series is yet another breakthrough breeding program. Lavish® have compound flower heads that produce ridiculous amounts of beautiful bracts. The abundance of thick, false flowers brings retail hold capabilities for weeks. Among the earliest of all lavender to flower, Lavish® may hit the market early and will continually bloom for months. Garden height is 12” to 18”. Zone 7

Utility Patent Number iUS9,301,463iB1
**LAVENDER STOECHAS MADRID® MAGNUM PURPLE**

Madrid® Magnum Purple is a large growing Lavender stoechas selection, ideal for 2 gallon production. The Madrid® Magnum flowers produce an abundance of massive colorful bracts, resulting in a stunning display. Garden height is 15” to 20”. Zone 7

**LAVENDER STOECHAS NEW MADRID®**

New Madrid® series has been improved with selection for market leading earliness to flower and plant uniformity across the series. The New Madrid® have larger flowers and larger bracts. The New Madrid® series easily sets the standard for all Spanish lavender. The all NEW Star Purple is another first with its clean star shaped pattern. Garden height is 12” to 18”. Zone 7
LEUCANTHEMUM DARLING DAISY®

Leucanthemum Darling Daisy® has a short stature and a small, pure white daisy flower. Darling Daisy® are continuous flowering, so they are easy to finish for early sales. Perfect for quarts and gallon containers. Garden height is 6" to 8". Zone 6

LEUCANTHEMUM DOUBLE DARLING DAISY®

With a fully double flower and compact habit, Double Darling Daisy® is positioning itself as a crowd favorite. The snowball shaped flowers sit cleanly on this day length neutral selection for a tidy appearance throughout the entire growing season. Garden height is 8" to 10". Zone 5

LEUCANTHEMUM CARPET ANGEL DAISY®

Yet another industry first in leucanthemum breeding, the world’s only ground cover shasta daisy! Carpet Angel Daisy® shows off incredible basal branching, producing a prostrate habit for a carpet appearance. Dozens of double blooms will sit tightly on the foliage all season long. A truly revolutionary selection! Garden height is 3" to 4". Garden width is 18" to 20". Zone 4

LEUCANTHEMUM DARLING DAISY® SUPREME

It is easy to see the supremacy of Darling Daisy Supreme®! With industry exclusive breeding program to develop multiple flowering branches along the same stem, Darling Supreme® rarely cycles out of color. This is a clear advancement for all leucanthemum breeding. Garden height is 12" to 15". Zone 3
LEUCANTHEMUM ANGEL DAISY®

Angel Daisy® is so early to flower, it makes production planning a snap. Angel Daisy® has anemone flowers that transition to pure white. Excellent for containers or as a mixed element. Garden height is 8” to 12”. Zone 4

LEUCANTHEMUM DOUBLE ANGEL DAISY®

The all NEW Double Angel Daisy® throws a massive number of fully double flowers all season long. With a habit matching the industry leading Angel Daisy® perfectly, Double Angel Daisy® will boast the same finishing time and garden performance with a unique flower formation. Garden height 8” to 12”. Zone 4

LEUCANTHEMUM WHITE MOUNTAIN®

White Mountain® is also day length neutral. White Mountain® boasts large blooms on stout plants and can be programmed to flower for retail sales from early spring to well into fall. Ideal for larger container, White Mountain® is the flag ship of the Green Fuse® Botanicals Leucanthemum program. Garden height is 18” to 24”. Zone 4

LEUCANTHEMUM BETSY®

Betsy® is the world’s largest flowering day length neutral shasta daisy. With flower sizes of 5” to 8” Betsy® will blow you away! Thick petals translate into a single flower holding beautifully on the plant for multiple weeks. Geared for 1.5 gallon to 2 gallon production, Betsy’s® robust stature will impress! Garden height is 18” to 20”. Zone 4
LUPINE STAIRCASE®

The Lupine Staircase® Series is the pure definition of First Light™ perennials. Able to flower under any day length without the need for vernalization. Let the growing temperature dictate your finish date, not the plant requirements. They will also continue to produce impressive flower displays until the heat of summer. Once the night time temperatures cool, the Staircase® series will come back into their glory. The all new Red/White is a standout in this seven-color series. This also allows for a fantastic new fall crop. The Staircase® series allows any grower to become a lupine grower!

Garden height is 18" to 24". Zone 3

Utility Patent # UP 10412924
**RUDBECKIA DAKOTA™**

A revolutionary breeding program brings the industry first truly zone hardy Rudbeckia hirta. The Dakota™ series is completely day length neutral, so the spring perennial market is just as easily achieved as the summer. Dakota™ Gold throws massive rich gold flowers measuring five to seven inches across. The First Look™ trial variety of Red Shield shows deep bicolor flowers. The Dakota™ Rudbeckia is a must have for all perennial growers. Garden height 15” to 18”. Zone 5

Red Shield

---

**SILENE CAROL JEAN™**

An all NEW genus for Green Fuse® Botanicals, Carol Jean™ showcases revolutionary performance on an old world plant. Carol Jean™ Pink and White lend themselves as a ground cover, while Tall Rose shines brightly over all other perennials. A true heat lover, the Carol Jean™ series will explode with color all summer long. Pink and White height 4” to 5”, width 18” to 24”. Tall Rose height 18” to 20”. Zone 5

![Pink](image3)

Pink

![Tall Rose](image4)

Tall Rose
Salvia nemorosa Swifty® is early flowering and delivers more flower spikes on a compact plant frame. Garden performance is absolutely outstanding as they resist foliage disease common to other nemorosa. Garden height is 10” to 15”. Zone 3.
SCABIOSA GIGA®

Scabiosa Giga® Blue showcase exceptionally large flowers with excellent garden performance. Giga® Silver may have more traditional sized scabiosa flowers, but in a very untraditional, massive quantity. The all new Pink maintains the large flower Giga® are known for. All are early to flower. These larger framed plants fill containers quickly and can be programmed to meet a spring through summer sales schedule. Garden height is 16” to 20”. Zone 4
TRIFOLIUM 4 LUCK®

Trifolium 4 Luck® are exceptional component plants for annual or perennial mix containers. Their landscape performance is fantastic as a border or a perennial groundcover. The multicolored plants will form a tight, mounded canopy that is both heat and cold tolerant. 4 Luck® have been bred to develop four leaves per petiole for enhanced grower luck. Finished height is 2" to 4". Zone 4
VERONICA VERNIQUE®

Veronica Vernique® is first year flowering and its day length neutrality means it can be scheduled to finish from early spring through fall. The color intensity of the all new Raspberry rounds out the color palette. Vernique® are a uniform, compact series of plants and with seven colors creates endless gardening and mixed container possibilities. The Vernique® series is a must have for both annual and perennial growers. Garden height is 10" to 14". Zone 4.
IBERIS GIBRALTARICA CHILL™ LAVENDER

The Spring season just got a whole lot cooler with this all new selection. While this selection does require vernalization, its smooth lavender flowers are a welcomed achievement in this genus. Chill™ has been intentionally bred to bloom just a couple weeks later than traditional Iberis in order to greet the higher traffic in spring, rather than late winter.

Garden Spread 15” to 18”. Zone 4

MONARDA MARJE®

Marje® will require long days like other monarda, but unlike other monarda, Marje® has incredible resiliency to mildew. Its compact habit becomes loaded with unusually large blossoms through the summer and into the fall.

Garden height is 12” to 15”. Zone 4
