The breeding goal of the First Light® Perennial program is to offer perennials that can be programmed to flower as you would annual selections. Schedule these selections to meet a desired week instead of waiting for the traditional photoperiod. This will not only remove many weeks of crop time allowing for additional rotations, but also dramatically saves on labor as the crops are able to always be fresh.
BEGONIA SHADOW KING®
The Green Fuse® Shadow King® series has small leaves and is heavily branched, making them the perfect fit for smaller containers and combinations. The uniformity within the series ensures predictable scheduling and shipping. The complete, textural color selection will enhance any retail bench. Finished height will be 8” to 12”.

BEGONIA REX BEWITCHED™
The strong upright growth and incredible leaf structure on the Bewitched™ series is just plain spooky! Noted for their cut leaf, the crisp colors, with deep veins is a must have for any Begonia Rex program. Finish times are blazing fast, just like the Dibs®, due to their aggressive growth habit, it’s just plain scary! Finished height of 12” to 18”.

New color selections for the Shadow King® series include:
- Black Cherry
- Lava Red
- Lemon Love
- Lime Ricky

New color selections for the Bewitched™ series include:
- Lavender
- Cherry
- Rose
- White
- Silver
- Red Black
- Wintergreen
- Night Owl
- Pink
- Spiderman
- Spearmint
- Wintergreen

Bred by Koppe. Plants protected under USPP 24,770; USPP 24,738; USPP 23,468; USPP 27,483 and USPPAF.
**BEGONIA REX CURLY™**
The Curly™ series delivers the traditional “snail” type leaf formation on a reimagined plant habit. This strong vigor series allows growers to finish with consistency never before seen on the classic leaf type. The color intensity will easily be a favorite at the retail level. Finished height of 12” to 18”.

**BEGONIA REX DIBS®**
Begonia Dibs® are spectacular! Unsurpassed vigor and basal branching make Begonia Dibs® a completely new breeding portfolio for Rex Begonia. Best suited for containers 6” and up, the Dibs® crush traditional rex timing standards. Perfectly suited for holiday sales as well as spring color pots. Finished height will be 12” to 18”.

**ECHEVERIA CORAL REEF®**
It’s a simple process to see the attributes of the Coral Reef® series as the name clearly defines the plant. Strongly pronounced ruffled foliage being contrast and interest that demands consumers to reach out and touch. A true Lifestyle™ plant, Coral Reef® positions itself perfectly indoors or out. Height is 5” to 10”.

**STREPTOCARPUS LADYSLIPPERS®**
Ladyslippers®, a GreenFuse® Lifestyle Plant™, will perform with a burst of continuous blooms indoors near a window or in shady areas out of doors. An ideal mixed-shade container could include Ladyslippers® with other components such as Shadow King® Begonia, Fuchsia Windchimes® and other shade tolerant plants. Finished height is 6” to 10”.

ANIGOZANTHOS JOEJOE®
Anigozanthos JoeJoe® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. JoeJoe® works great in quarts through gallons. They will finish quickly easily allowing multiple turns in a season. Finished height is 12” to 15”.

ANIGOZANTHOS JUMP®
Anigozanthos Jump® are excellent in landscapes and for large containers. Jump® are larger growing plants with excellent disease resistance and drought tolerance. Hummingbirds find the brightly colored tubular flowers of these Anigozanthos irresistible. Finished height is 24” to 36”.

ANIGOZANTHOS KANGA®
Anigozanthos Kanga® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. Kanga® is geared for quick turn gallon production. They will finish quickly easily allowing multiple turns in a season. Finished height is 17” to 20”.

ANIGOZANTHOS BIG ROO®
Anigozanthos Big Roo® are excellent in landscapes and for large containers. Big Roo® are the largest Anigozanthos we carry. They feature excellent disease resistance and drought tolerance, and hummingbirds love them! Finished height is 48” to 60”.

ARCTOTIS MAJEC™

This ALL NEW five color series will quickly become a grower and consumer favorite. Soft silver foliage on a well rounded habit delivers season long vibrant blooms. An excellent choice to welcome spring at retail, the MAJEC™ series throws out an impressive number of single “daisy” type flowers for the entire growing season. Garden height 8” to 10”.

BIDENS DOUBLON™

Doubloon™ puts on a show of gold in the garden that lasts the entire summer. Doubloons™ compact size plays well for perfect containers without the need for growth regulators. The ALL NEW Red Bicolor ensures endless combinations. Finished height is 4” to 6”.

NEW SERIES

Gold

Scarlet

NEW
Calibrachoa Cruze® Control series boast enormous flowers and a more "controlled" habit than other calibrachoa. Plants have shorter internodes producing more branching for a beautifully full container. The multicolored "Splash" additions bring a whole new level of interest. Cruze® Control are among the earliest of all to flower, so they are perfect for any part of the world. Mature height is 6” to 10”.
**CLEOME CLEMENTINE™**

The combination of daylength neutrality and superior basal branching gives the Clementine™ series easy container fill in both small and large containers. Geared for the hottest environments, Clementine™ will throw massive blooms all season long. Mature height is 24” to 30”.

---

**EUPHORBIA CRYSTAL™ WHITE**

Euphorbia Crystal™ White flowers non-stop and is a great impact plant with its sparkling white blossoms. Their incredible branching structure produces near perfect small pots. This Euphorbia is the perfect drought and heat tolerant component plant for mixed containers and hanging baskets. Mature height is 8” to 12”.

---

**FUCHSIA WINDCHIMES® BASKET**

The Windchimes® Baskets flower under short days and continue to perform as high summer temperatures approach. They are perfect for all sizes of baskets and great for mixed containers, too. Their tight internode structure equates to higher density production and shipping. Huge flowers are reminiscent of older style fuchsia, but still deliver the uniformity of new breeding. Finished height is 8” to 14”.

FUCHSIA WINDCHIMES® UPRIGHT

The Windchimes® Upright are sturdy enough to hold their upright habit while loaded with massive blooms, making them perfect for pot crops and combinations. They will flower in short days to hit the market extremely early. An excellent choice for the elusive shade combination. Finished height is 10” to 16”.

IPOMOEA SWEET GEORGIA®

The Ipomoea Sweet Georgia® series is a heavily branched series with a completely uniform, compact habit and proven performance. Their combination friendly habit extends their use easily into mixed containers. The Sweet Georgia® series includes selections with both palmate and heart shaped leaf forms, as well as the variegated selection of Green Splash. Mature height is 4” to 6”.

18 | 19
Every garden bed needs a Blanket® Petunia to keep it covered with beautiful colors through the most extreme summer conditions. Blanket® Petunias are also great in containers that grow to dramatic proportions throughout summer. The ideal quick crop petunia to allow multiple turns within the season, even with just 1 plant per basket. Their milliflora flowers require near zero maintenance for the consumer, even the doubles are excellent at self-cleaning. The ALL NEW Silver Surprise is an instant one plant combination! Plants will reach 6” to 8” in height with an impressive 36” spread.
PETUNIA GOOD AND PLENTY®

Good and Plenty® varieties flower early, even when grown in the shortest of days. But what really makes Good and Plenty® a “must grow” choice for growers is their near perfect habit. Plants wrap containers in bouquets of flowers. Predictable finishing allows for perfect containers and combinations. Garden height is 8” to 10”.

PORTULACA 24/7™

All new breeding in portulaca brings this revolutionary new series to the market. Like your neighborhood quick shop, the 24/7™ flowers never close! The 24/7™ series not only boasts large, 2-3” fully double flowers but is also day length neutral. The five colors of fuchsia, orange, red, white and yellow are perfect in quarts through basket production. Garden height is 4” to 6”.

PLECTRANTHUS LION™

The compact habit makes the Lion™ series an easy choice for summer and fall sales as they resist stretch under high temperatures. The perfect colors and foliage for both monoculture and combinations. Ideal for quart through patio containers. Mature height is 10” to 12”.
RUDBECKIA RISING SUN® CHESTNUT GOLD
The first ever day length neutral Rudbeckia Hirta has proven itself an all-star award winner in trial gardens around the world. Chestnut Gold is ready for sales year round without the need for supplemental lighting. From the earliest of spring through autumn frost, Rising Sun is the only Rudbeckia needed in your Hirta program. Garden height is 18” to 24”.

RUDBECKIA RODEO™ DOUBLE RED
Fantastically unique fully double, deep red flowers will generate late spring sales through fall. Rodeo™ will deliver consumer excitement with never before seen color on this fan favorite genus. Coming into flower under long days, Rodeo™ Double Red will flower continuously until heavy frost. Garden height is 18” to 24”.

SALVIA CATHEDRAL®
Salvia Cathedral® is a true outdoor performer for all regions, including hot and humid environments. The series is early to flower with a wide range of colors. Their consistently uniform habit throughout the series allows row run shipping. Also perfect for multicolored mixed containers. Garden height is 12” to 16”.

SALVIA SPLENDENS GRANDSTAND™
Grandstand™ are real show-offs when it comes to color. Grandstand™ flower continuously from early spring until the first frost of fall. The multiple spikes of flowers display masses of color on compact plant frames. Grandstand™ are perfect for both landscapes and containers. Garden height is 15” to 20”.

SALVIA X BUCHANANII FASHION™
Salvia Fashion™ is explosive with color in the landscape. All five colors produce hundreds of blooms at a time for an intense garden display. One of the best pollinator genus on the market, this day length neutral series is perfect for larger container production year round. Garden height is 24” to 30”.

- Blue Bicolor
Sutera (Bacopa) Betty® are best known for their incredible heat performance that has been showcased in trials across North America. Their industry-leading large flowers completely cover the plant all season. The ALL NEW Pink perfectly matches the classic favorite Betty White. Mature height is 6” to 8” with a 10” to 12” spread.

Scaevola Scampi® have large flowers and short internodes that will maintain a tidy plant habit for months. Excellent garden performance in national trials has made Scampi® a crowd favorite. The well-matched Scampi® series can also be planted together or with other species to create beautiful, long-lived containers. Finished height is 6” to 10”.

Verbena Vivid® have proven to be Powdery Mildew resistant after years of spring and summer trials in all areas of the country. Their wide color range makes Vivid® perfect for a complete Verbena program. Vivid Swirl’s two-tone colors easily grab attention at the retail level. Garden height is 5” to 8”.

NEW
VINCA QUASAR™

Vinca Quasar are out of this world. The series features a selection of unique colors that will leave you star-struck. All have the exceptionally large flowers you would expect of a hybrid Vinca. Hybrid vigor and intensive breeding selections ensure excellent summer disease resistance. Check out Deep Space Blue as well as our ALL NEW White Target with an unusual near black eye. Garden height is 10” to 12”.

ANNUAL COMPATIBLES®

The GreenFuse® Botanicals multiple variety annual mixes are not only striking in appearance but are appropriately named Compatibles® for their perfectly balanced performance. Compatibles® also feature a carefully selected color palette to complement any environment or holiday. The Patio Collection brings predictable performance for patio containers with both upright and trailing cultivars.

ANNUAL COMPATIBLES®
**PERENNIAL COMPATIBLES**

First Light® Perennial Compatible® can be scheduled and finished just like annual mixes. No more worrying about forcing varieties out of season or planning for special cold requirements or vernalizations. The First Light® Perennial Compatible® are completely programmable, since all our components are completely day length neutral and require zero cooling. These mixes shine brightly for early spring sales, through the summer heat and are a great companion crop to break the mundane of fall mum programs.

ACHILLEA SUN N’ FUN™ GOLD
This ALL NEW genus for GreenFuse® delivers complete day length neutrality on an extremely compact habit. Sun N’ Fun Gold will maintain its tidy habit while it flowers all season. Deep gold flowers fade to an attractive true yellow. Excellent heat performance allows for season long performance. Garden height 10” to 12”. Zone 4

AGASTACHE SUNRISE™
Sunrise™ Agastache flower continuously from early spring until autumn frost. This series was bred for color intensity and strong branching. Sunrise™ offer great heat and drought tolerance. Perfect in both perennial and annual mixed containers. Agastache Sunrise™ are among the greatest of all pollinator plants. A must have for all perennial programs. Garden height is 18” to 24”. Zone 5

BUDDLEJA LEAH™
Massive flowering spikes on this daylength neutral series clearly shines for year round sales. The ALL NEW Midnight intensifies this four color series. Strong basal branching on these compact selections allows for sales in containers as small as a quart in full flower. The series uniformity can translate into stunning three color mixes. Garden height 20” to 24”. Zone 5

COREOPSIS REINA™
Reina™ is clearly regal in its performance. With extremely large semi-double blossoms, Reina™ looks easily at home in a perennial garden or in a mixed combination. The ALL NEW Single Giant Gold shows off the largest flowers of all coreopsis. Daylength neutrality in both of the Reina™ allows year long sales with an extremely quick finish time. Garden height is 12” to 15”. Zone 5
DELSPERMA DELMARA™
Massive, brightly colored blossoms in combination with rock solid hardiness demand series attention. The strong branching on a mounding habit translates to flowers all over the plant and not just the tips. The Delmara™ series has quickly positioned itself as a standard in grower programs. Delmara™ has proven garden performance from the deep south to the western mountain ranges. Garden spread is 18” to 24”. Zone 4

DIANTHUS CONSTANT BEAUTY®
Constant Beauty® flower “constantly” even in the warmest summer conditions. These beauties have double flowers and delightfully subtle fragrance. Strong landscape performance and full color range make these a standard for all dianthus programs. The Constant Beauty® Crush selections dazzle with their delicious bicolor blossoms. Mixed containers are only limited by your imagination as they will all perform exactly the same. Garden height is 6” to 10”. Zone 4
DIANTHUS CONSTANT CADENCE®
Dianthus Cadence are another easy to program First Light Perennials® from Green Fuse. This uniform series of fully double flowers deliver a pot carnation look with landscape vigor. Milk Cherry, Peach Milk and the ALL NEW Potpourri give combination color as the flowers go through many shades as they harden. Garden height is 6” to 8”. Zone 4

DIANTHUS CONSTANT PROMISE™
This series of a Chinensis x Barbados is landscape and zone hardy. It promises to bring season long color on extra-large blooms that sit neatly on top of the foliage. Constantly the first dianthus to come into color and the last to go out of color. Like all Green Fuse® Botanicals dianthus, its neutrality and zero vernalization requirements make scheduling a snap. Garden height is 10” to 12”. Zone 4
**Gaillardia Lunar®**
Gaillardia Lunar® are sturdy garden performers even in the most arid of climates. Their massive flowers are early to bloom and sit tightly on top of their well-rounded habit. Tightly packed internodes have strong resistance to splitting as the flowers develop. They are excellent in our Perennial Companibles® mixes. Garden height is 6” to 10”. Zone 5

**Gaura Bantam®**
Gaura Bantam® have compact flower stems and a mounded plant shape. Bantam® will flower easily under short days, hitting the early spring market. Bantam® Iris Pink will delight all consumers with its striking variegation and deep rose blossoms. Garden height is 10” to 14”. Zone 5

**Hydrangea Game Changer®**
GreenFuse® was extremely proud to bring another industry first to the market, the Hydrangea GameChanger® Series. The first and only hydrangea in the world to not only be daylength neutral, but the Gamechanger® series requires zero chilling! This removes twenty four to thirty weeks of production time. The massive lace-cap flowers will bloom continuously from spring through frost. The remarkable hardiness will make this a standard in perennial gardens throughout the world! The pot crop performance of the series has repositioned traditional Christmas and Easter sales genera. Garden height is 20” to 24”. Zone 5
LAVENDER DENTATA PARIS® BLUE
Paris® Blue boasts an incredibly heavy branched habit, easily setting itself apart from the traditional Dentata. This bred habit allows for three to four times the blooms, while behaving perfectly in high density container production. Garden height is 12” to 15”, Zone 7

LAVENDER STOECHAS LAVISH®
The Lavish® series is yet another breakthrough breeding program. Lavish® have compound flower heads that produce ridiculous amounts of beautiful bracts. The abundance of thick, false flowers brings retail hold capabilities for weeks. Among the earliest of all lavender to flower, Lavish® may hit the market early and will continually bloom for months. Garden height is 12” to 18”, Zone 7

LAVENDER STOECHAS MADRID® MAGNUM PURPLE
Madrid® Magnum Purple is a large growing Lavender stoechas selection, ideal for 2 gallon production. The Madrid® Magnum flowers produce an abundance of massive colorful bracts, resulting in a stunning display. Garden height is 15” to 20”, Zone 7

LAVENDER STOECHAS NEW MADRID®
The New Madrid® series has been improved with selection for market leading earliness to flower and plant uniformity across the series. The New Madrid® have larger flowers and larger bracts. The New Madrid® series easily sets the standard for all Spanish lavender. Star Purple is another first with its clean star shaped pattern. Garden height is 12” to 18”, Zone 7
LEUCANTHEMUM

**Bloom Size Comparison**

**DARLING DAISY**
Leucanthemum Darling Daisy® has a short stature and a small, pure white daisy flower. Darling Daisy® are continuous flowering, so they are easy to finish for early sales. Perfect for quarts and gallon containers. Garden height is 6” to 8”. Zone 6

**DOUBLE DARLING DAISY**
With a fully double flower and compact habit, Double Darling Daisy® is positioning itself as a crowd favorite. The snowball shaped flowers sit cleanly on this day length neutral selection for a tidy appearance throughout the entire growing season. Garden height is 8” to 10”. Zone 5

**CARPET ANGEL DAISY**
Yet another industry first in leucanthemum breeding, the world’s only ground cover shasta daisy! Carpet Angel Daisy® shows off incredible basal branching, producing a prostrate habit for a carpet appearance. Dozens of double blooms will sit tightly on the foliage all season long. A truly revolutionary selection! Garden height is 3” to 4”. Garden width is 18” to 20”. Zone 4

**DARLING DAISY SUPREME**
It is easy to see the supremacy of Darling Daisy Supreme®! With industry exclusive breeding program to develop multiple flowering branches along the same stem, Darling Supreme® rarely cycles out of color. This is a clear advancement for all Leucanthemum breeding. Garden height is 12” to 15”. Zone 3

**ANGEL DAISY**
Angel Daisy® is so early to flower, it makes production planning a snap. Angel Daisy® has anemone flowers that transition to pure white. Excellent for containers or as a mixed element. Garden height is 8” to 12”. Zone 4

**DOUBLE ANGEL DAISY**
The all NEW Double Angel Daisy® throws a massive number of fully double flowers all season long. With a habit matching the industry leading Angel Daisy® perfectly, Double Angel Daisy® will boast the same finishing time and garden performance with a unique flower formation. Garden height 8” to 12”. Zone 4

**CARPET ANGEL DAISY**
Yet another industry first in leucanthemum breeding, the world’s only ground cover shasta daisy! Carpet Angel Daisy® shows off incredible basal branching, producing a prostrate habit for a carpet appearance. Dozens of double blooms will sit tightly on the foliage all season long. A truly revolutionary selection! Garden height is 3” to 4”. Garden width is 18” to 20”. Zone 4

**WHITE MOUNTAIN**
White Mountain® is also day length neutral. White Mountain® boasts large blooms on stout plants and can be programmed to flower for retail sales from early spring to well into fall. Ideal for larger container, White Mountain® is the flagship of the Green Fuse® Botanicals Leucanthemum program. Garden height is 18” to 24”. Zone 4

**BETSY**
Betsy® is the world’s largest flowering day length neutral shasta daisy. With flower sizes of 5” to 8” Betsy® will blow you away! Thick petals translate into a single flower holding beautifully on the plant for multiple weeks. Geared for 1.5 gallon to 2 gallon production, Betsy® robust stature will impress! Garden height is 18” to 20”. Zone 4
LUPINE STAIRCASE®

The Lupine Staircase® Series is the pure definition of First Light™ perennials. Able to flower under any day length without the need for vernalization. Let the growing temperature dictate your finish date, not the plant requirements. They will also continue to produce impressive flower displays until the heat of summer. Once the night time temperatures cool, the Staircase® series will come back into their glory. Red/White is a standout in this seven-color series. This also allows for a fantastic new fall crop. The Staircase® series allows any grower to become a lupine grower! Garden height is 18” to 24”. Zone 3

RUDBECKIA DAKOTA™

A revolutionary breeding program brings the industry first truly zone hardy Rudbeckia Hirta. The Dakota™ series is completely day length neutral, so the spring perennial market is just as easily achieved as the summer. Dakota™ Gold throws massive rich gold flowers measuring five to seven inches across, while Red Shield highlights deep fall color tones. The ALL NEW Double Gold and Flame throw impressive texture and color. The Dakota™ Rudbeckia is a must have for all perennial growers. Garden height 15” to 18”. Zone 5

Utility Patent # UP 10412924
**SILENE CAROL JEAN™**
Carol Jean™ showcases revolutionary performance on an old world plant. Carol Jean™ pink and white lend themselves as a ground cover, while tall rose shines brightly over all other perennials. A true heat love, the Carol Jean™ series will explode with color mid spring and all summer long. Pink and White Height 4” to 5”, width 18” to 24”. Tall Rose height 18” to 20”. Zone 5

**SALVIA SWIFTY®**
Salvia nemorosa Swifty® is early flowering and delivers more flower spikes on a compact plant frame. Garden performance is absolutely outstanding as they resist foliage disease common to other nemorosa. Garden height is 10” to 15”. Zone 3

**SCABIOSA GIGA®**
Scabiosa Giga® Blue showcase exceptionally large flowers with excellent garden performance. Giga® Silver may have more traditional sized scabiosa flowers, but in a very untraditional, massive quantity. The 2020 intro of Pink and the ALL NEW Deep Ocean maintain the large, recognizable flower of the Giga®. All are day length neutral and require zero cold treatments. These larger framed plants fill containers quickly and can be programmed to meet a spring through summer or fall sales schedule. Garden height is 16” to 20”. Zone 4
TRIFOLIUM 4 LUCK®
Trifolium 4 Luck® are exceptional component plants for annual or perennial mix containers. Their landscape performance is fantastic as a border or a perennial groundcover. The multicolored plants will form a tight, mounded canopy that is both heat and cold tolerant. 4 Luck® have been bred to develop four leaves per petiole for enhanced grower luck. Finished height is 2” to 4”. Zone 4

VERONICA VERNIQUE®
Veronica Vernique® is first year flowering and its day length neutrality means it can be scheduled to finish from early spring through fall. The color intensity of Raspberry rounds out the color palette. Vernique® are a uniform, compact series of plants and with seven colors creates endless gardening and mixed container possibilities. The Vernique® series is a must have for both annual and perennial growers. Garden height is 10” to 14”. Zone 4
**IBERIS GIBRALTARICA CHILL™ LAVENDER**

The Spring season just got a whole lot cooler with this selection. While this selection does require vernalization, its smooth lavender flowers are a welcomed achievement in this genus. Chill™ has been intentionally bred to bloom just a couple weeks later than traditional Iberis in order to greet the higher traffic in spring, rather than late winter. Garden Spread 15” to 18”. Zone 4

**MONARDA MARJE®**

Marje® will require long days like other monarda, but unlike other monarda, Marje® has incredible resiliency to mildew. Its compact habit becomes loaded with unusually large blossoms through the summer and into the fall. Garden height is 12” to 15”. Zone 4
