WELCOME 2023-2024

All of us at Green Fuse® Botanicals would like to welcome you to our 2023/2024 North American offerings. We are also extremely proud to share that our new facility in the hills of Somis, California is officially opened! Situated in a fully operational Lemon Grove, known to the community as Green Fuse® Grove, we concentrate on more than breeding. With a fully functional stock facility for domestically required product as well as one of the nation’s largest tissue culture laboratories. It is in these hills where we focus on you, our customer, and our commitment to revolutionary genetics. Our new facility clearly promotes our breeding directive and commitment to our growing partners. Green Fuse® Botanicals also owns and operates Calico® Genetics, our internal breeding company as well as a liaison to our global network of breeding partners. Calico® Genetics strives to not only deliver varieties with a purpose to the marketplace, but to orient all breeding to the ultimate goal of grower ready solutions.

Our grower advantage breeding clearly extends to our end gardening consumer. This year we deliver the all NEW Endless Ground Color Program. A clear directive in our First Light® Perennial program. This will allow both the grower and the consumer direction in zone hardy groundcovers that boast intense flower and foliage colorings. We are also excited to share the continued expansion of our stage III tissue culture offerings to the market. Domestic supply does not only ease demand for high minimums and high freight, but it most importantly puts the product into the growers’ hands in the shortest possible time frame.

We at Green Fuse® Botanicals are constantly and systematically driven to the continuation of breeding breakthroughs delivered to the horticultural community. It is the trust and support of you, our growing partners, that is the true strength of the program. We strive for our partnership to ensure success for us both in our fourteenth season and for many to come.
Lifestyle™ Plants is our selection of genetics designed for the changing life-style needs of our customers. Lifestyle™ Plants can be grown for outdoor seasonal color or as indoor house plants. Year round availability brings all new options for seasonal programs. There are no boundaries to where we can bring color into our lives!

The breeding goal of the Green Fuse® Botanicals Optimum™ Annuals program is to deliver uniformity within each series for ease of production. Each color in each series will perform uniformly regardless of geography. The earliness to flower allows delivery anytime of year.

The continued advancement of the Green Fuse® First Light® perennial program delivers another industry first! A complete program of zone hardy groundcovers that actually deliver color! Texture in foliage, intensity of season long blooms and habits that perform in a well maintained aggression, the Endless Ground Color program not only changes the game, but literally the ground!

The First Light® Perennial program contains first year flowering varieties that require no cold treatment (vernalization) to flower and are day length neutral. The goal of First Light® Perennials is to offer perennials that can be programmed to flower as you would annual selections. Schedule these selections to meet a desired week instead of waiting for the traditional photoperiod. This will not only remove many weeks of crop time allowing for additional rotations, but also dramatically saves on labor as the crops are able to always be fresh.

BEGONIA REX BEWITCHED®

The strong upright growth and incredible leaf structure on the Bewitched® series is just plain spooky! Noted for their cut leaf, the crisp colors, with deep veins is a must have for any Begonia Rex program. Finish times are blazing fast, just like the Dibs™, due to their aggressive growth pattern. A yearlong sales window, with such an excellent habit, it’s just plain scary! Garden height is 12” to 18”.

BEGONIA CITIZEN CANE® PINK

Coming into its first full production year in the Green Fuse® Lifestyle™ collection, Citizen Cane® Pink will absolutely demand retail attention. Its crisp dark foliage with clean white polka dots lends well to foliage programs. It will also maintain massive strings of deep pink blossoms with strong fragrance all growing season. Tight internodes and strong stems allow for worry free shipping. Garden height is 18” to 20”.

**BEGONIA REX CURLY®**

The Curly® series delivers the traditional “escargot” type leaf formation, on a reimagined plant habit. This strong vigor series allows growers to finish with consistency never before seen on the classic leaf type. The all NEW Curly® Cherry Soda is perfectly sweet in delivering the bright color patterns. The color intensity will easily be a favorite at the retail level. Garden height is 12” to 18”.

**BEGONIA REX DIBS™**

Begonia Dibs™ are spectacular! Unsurpassed vigor and basal branching make Begonia Dibs™ a breeding portfolio for Rex Begonia. Best suited for containers 6” and up, the Dibs™ crush traditional rex timing standards. Perfectly suited for holiday sales as well as spring color pots. Garden height is 12” to 18”.
BEGONIA SHADOW KING®

The Green Fuse® Shadow King® series has small leaves and is heavily branched making them the perfect fit for smaller containers and combinations. The uniformity within the series ensures predictable scheduling and shipping. It is easy to completely adore the all NEW Love selections in the Shadow King® Series. Four all NEW colors in Lime, Burgundy, Vintage and Turtle will pop at retail with their bright, trendy color patterns. The complete, textural color selection will fill every textural and color pattern need. Garden height is 8” to 12”.

ECHEVERIA CORAL REEF®

It's a simple process to see the attributes of the Coral Reef® series as the name clearly defines the plant. Strongly pronounced ruffled foliage brings contrast and interest that demands consumers to reach out and touch. A true Lifestyle™ Plant, Coral Reef® positions itself perfectly indoors or out. Garden height is 5” to 10”.

TRADESCANTIA PISTACHIO® WHITE

A breeding breakthrough allows this multiple award winning tradescantia to maintain heavy white variegation while still supporting vigorous growth. An excellent selection for monoculture in quarts through hanging baskets, as well an eye popping combination item. Year-round sales are simple as a spring or foliage item. Garden height is 4” to 6”.

Chocolate

Red
STREPTOCARPUS LADYSLIPPERS®

Ladyslippers®, a Green Fuse® Lifestyle™ Plant, will perform with a burst of continuous blooms indoors near a window or in shady areas out of doors. One of the fastest growing genus in sales, this classic plant developed an all new placement in retail settings. The all NEW Cherry Ice maintains crisp deep rose colors indoors or out! Garden height is 6” to 10”.

ANIGOZANTHOS JOEJOE®
Anigozanthos JoeJoe® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. JoeJoe® works great in quarts through gallons. They will finish quickly easily allowing multiple turns in a season. Garden height is 12” to 15”.

ANIGOZANTHOS KANGA®
Anigozanthos Kanga® are great in containers where they showcase a more compact habit than Jump® or Big Roo®. Kanga® is geared for quick turn gallon production. The all NEW Kanga Orange is a grower favorite for the multiple blooming stalks. They will finish quickly easily allowing multiple turns in a season. Garden height is 17” to 20”.

Cherry Orange Red Yellow
Burgundy Pink
**ANIGOZANTHOS JUMP®**

Anigozanthos Jump® are excellent in landscapes and for large containers. Jump® are larger growing plants with excellent disease resistance and drought tolerance. The introduction of Jump® Red and Orange brings a full color palette to the series. Hummingbirds find the brightly colored tubular flowers of these Anigozanthos irresistible. Garden height is 24" to 36".

**ANIGOZANTHOS BIG ROO®**

Anigozanthos Big Roo® are excellent in landscapes and for large containers. Big Roo® are the largest Anigozanthos we carry. They feature excellent disease resistance and drought tolerance, and hummingbirds love them! Garden height is 48" to 60".
ARCTOTIS MAJEC®

This nine color series will quickly become a grower and consumer favorite. Soft silver foliage on a well rounded habit delivers season long vibrant blooms. An excellent choice to welcome spring at retail, the MAJEC® series throws out an impressive number of single “daisy” type flowers for the entire growing season. A hit for spring and fall sales in interesting colors compared to that of an osteospermum. Garden height is 8” to 10”.

**BIDENS DOUBLOON®**

Doubloon® puts on a show of gold in the garden that lasts the entire summer. Doubloons® compact size plays well for perfect containers and combinations without the need for growth regulators. Garden height is 4” to 6”.

**CLEOME CLEMENTINE®**

The combination of daylength neutrality and superior basal branching gives the Clementine® series easy container fill in both small and large containers. Geared for the hottest environments, Clementine® will throw massive blooms all season long. Garden height is 24” to 30”.

**COLOCASIA ILLUSTRIS**

This well known tropical plant has been reinvigorated through the Green Fuse® Tissue Culture laboratory, not only for cleanliness but also for consistency of supply. Massive dark leaves with chartreuse veining bring a lush, tropical feel to the garden all growing season.
Calibrachoa Cruze® Control series boast enormous flowers and a more “controlled” habit than other calibrachoa. Plants have shorter internodes producing more branching for a beautifully full container. The multicolored “Splash” additions bring a whole new level of interest. Cruze® Control are among the earliest of all to flower, so they are perfect for any part of the world. Garden height is 6” to 10”.
EUPHORBIA CRYSTAL® WHITE

Euphorbia Crystal® White flowers non-stop and is a great impact plant with its sparkling white blossoms. Their incredible branching structure produces near perfect small pots. This Euphorbia is the perfect drought and heat tolerant component plant for mixed containers and hanging baskets. Garden height is 8” to 12”.

FUCHSIA WINDCHIMES® UPRIGHT

The Windchimes® Upright are sturdy enough to hold their upright habit while loaded with massive blooms, making them perfect for pot crops and combinations. They will flower in short days to hit the market extremely early. An excellent choice for the elusive shade combination. Garden height is 10” to 16”.
FUCHSIA WINDCHIMES® BASKET

The Windchimes® Baskets flower under short days and continue to perform as high summer temperatures approach. They are perfect for all sizes of baskets and great for mixed containers, too. Their tight internode structure equates to higher density production and shipping. Huge flowers are reminiscent of older style fuchsia, but still deliver the uniformity of new breeding. Garden height is 8” to 14”.
The Ipomoea Sweet Georgia® series is heavily branched with a completely uniform, compact habit and proven performance. Their combination friendly habit extends their use easily into mixed containers. The Sweet Georgia® includes selections with both palmate and heart shaped leaf forms, as well as the variegated selections of Splash Green. The all NEW Heart Chestnut brings color tones of both bronze and chartreuse on this grower trial favorite. Multiple stock locations ensure excellent availability of this TOP SELLER. Garden height is 4” to 6”.

**Optimum ANNUALS**
LANTANA FUEGO®

A completely new breeding program has delivered the six color Fuego® series. Available in Gold, Orange, Pink, Rose, Red and White. Each of the Fuego® series excels in garden performance, with an aggressive habit perfect for six inch and up containers. Fuego® fires out color all growing season! Garden height is 15" to 20".
PETUNIA BLANKET®
Every garden bed needs a Blanket®Petunia to keep it covered with beautiful colors through the most extreme summer conditions. Blanket® Petunias are also great in containers that grow to dramatic proportions throughout summer. The ideal quick crop petunia to allow multiple turns within the season, even with just 1 plant per basket. Their milliflora flowers require near zero maintenance for the consumer, even the doubles are excellent at self-cleaning. Joining the top selling Silver Surprise is the all NEW Double Silver Surprise, both bring a combination of color in a single plant. Garden height is 6” to 8” with an impressive 36” spread.
PETUNIA GOOD AND PLENTY®

Good and Plenty® varieties flower early, even when grown in the shortest of days. But what really makes Good and Plenty® a “must grow” choice for growers is their near perfect habit. Plants wrap containers in bouquets of flowers. Predictable finishing allows for perfect containers and combinations. Garden height is 8” to 10”.
The compact habit makes the Lion® series an easy choice for summer and fall sales as they resist stretch under high temperatures. The perfect colors and foliage for both monoculture and combinations. Ideal for quart through patio containers. Garden height is 10" to 12".
PORTULACA 24/7®

Our revolutionary breeding in portulaca brings this popular series to the market. Like your neighborhood quick shop, the 24/7® flowers never close! The 24/7® series not only boasts large, 2-3” fully double flowers but is also day length neutral. The nine color series including the all NEW Gold, Pink and Salmon are perfect in quarts through basket production. Garden height is 5” to 6”.

RUDBECKIA RISING SUN® CHESTNUT GOLD
The first ever day length neutral Rudbeckia Hirta has proven itself an all-star award winner in trial gardens around the world. Chestnut Gold is ready for sales year round without the need for supplemental lighting. From the earliest of spring through autumn frost, Rising Sun® is the only Rudbeckia needed in your Hirta program. Garden height is 18” to 24”.

RUDBECKIA RODEO® DOUBLE RED
Fantastically unique fully double, deep red flowers will generate late spring sales through fall. Rodeo® will deliver consumer excitement with never before seen color on this fan favorite genus. Coming into flower under long days, Rodeo® Double Red will flower continuously until heavy frost. Garden height is 18” to 24”.
SALVIA CATHEDRAL®
Salvia Cathedral® is a true outdoor performer for all regions, including hot and humid environments. The series is early to flower with a wide range of colors. Their consistently uniform habit throughout the series allows row run shipping. Also perfect for multicolored mixed containers. Garden height is 12” to 16”.

Deep Blue  Lavender  Purple  Shining Sea  Sky Blue  White

SALVIA X BUCHANANII FASHION®
Salvia Fashion® is explosive with color in the landscape. All five colors produce hundreds of blooms at a time for an intense garden display. One of the best pollinator genus on the market, this day length neutral series is perfect for larger container production year round. Garden height is 24” to 30”.

Burgundy  Cherry  Orange  Pink  Rose
salvia splendens grandstand®

Grandstand® are real show-offs when it comes to color. Grandstand® flower continuously from early spring until the first frost of fall. The multiple spikes of flowers display masses of color on compact plant frames. Grandstand® are perfect for both landscapes and containers. Garden height is 15” to 20”.

SCAEVOLA SCAMPI®
Scaevola Scampi® have large flowers and short internodes that will maintain a tidy plant habit for months. Excellent garden performance in national trials has made Scampi® a crowd favorite. The well-matched Scampi® series can also be planted together or with other species to create beautiful, long lived containers. Garden height is 6” to 10”.

SUTERA (BACOPA) BETTY®
Sutera (Bacopa) Betty® are best known for their incredible heat performance that has been showcased in trials across North America. Their industry leading large flowers completely cover the plant all season. The Blue and Pink perfectly match the class favorite Betty White. Garden height is 6” to 8” with a 10” to 12” spread.
VERBENA VIVID®

Verbena Vivid® have proven to be Powdery Mildew resistant after years of spring and summer trials in all areas of the country. Their wide color range makes Vivid® perfect for a complete Verbena program. Vivid Swirl’s two-tone colors easily grab attention at the retail level. Garden height is 5” to 8”.

PERENNIAL COMPATIBLES®

First Light® Perennial Compatibles® can be scheduled and finished just like annual mixes. No more worrying about forcing varieties out of season or planning for special cold requirements or vernalizations. The First Light® Perennial Compatibles® are completely programmable, since all our components are completely day length neutral and require zero cooling. These mixes shine brightly for early spring sales, through the summer heat and are a great companion crop to break the mundanity of fall mum programs.
ACHILLEA SUN N’ FUN®
This genus for Green Fuse® delivers complete day length neutrality on an extremely compact habit. Sun N’ Fun® Gold and Red will maintain their tidy habit while it flowers all season. Deep gold flowers fade to an attractive true yellow. The Red delivers the same habit as Gold, but with deep red flowers. Excellent heat performance allows for season long performance. Garden height is 10” to 12”. Garden width is 20” to 24”. Zone 4

DELOSPERMA DELMARA®
Massive, brightly colored blossoms in combination with rock solid hardiness demands serious attention. The strong branching on a mounding habit translates to flowers all over the plant and not just the tips. The Delmara® series has quickly positioned itself as a standard in grower programs. Delmara® has proven garden performance from the deep south to the western mountain ranges. The ALL NEW pink/silver and red/gold deliver crisp contrast to the other Delmara® colors. Garden height is 2” to 3”. Garden spread is 18” to 24”. Zone 3

GAZANIA STERLING SILVER®
This all NEW zone 5 ground cover series will delight consumers with its silver foliage and massive blooms. Producing both double gold and burgundy stripe flowers, Sterling Silver® series will flower all season as a groundcover in any sunny landscape. Their fully double flowers remain open and consumer ready for days on end. Garden height is 3” to 5”. Garden width is 18” to 24”. Zone 5
LEUCANTHEMUM CARPET ANGEL DAISY®
Yet another industry first in leucanthemum breeding, the world’s only ground cover shasta daisy! An All America Selections Winner Carpet Angel Daisy® shows off incredible basal branching, producing a prostrate habit for a carpet appearance. Dozens of semi-double blooms will sit tightly on the foliage all season long. A truly revolutionary selection! Garden height is 3” to 4”. Garden width is 18” to 20”. Zone 4

SILENE CAROL JEAN®
A crowd favorite from GreenFuse® Botanicals, Carol Jean® showcases revolutionary performance on an old world plant. Carol Jean® pink and white lend themselves as a ground cover. A true heat lover, the Carol Jean® series will explode with color mid spring and all summer long. Garden height is 4”-5”. Garden width is 18”-24”. Zone 5

TRIFOLIUM 4 LUCK®
Trifolium 4 Luck® are exceptional component plants for annual or perennial mix containers. Their landscape performance is fantastic as a border or a perennial groundcover. The multicolored plants will form a tight, mounded canopy that is both heat and cold tolerant. 4 Luck® have been bred to develop four leaves per petiole for enhanced grower luck. Garden height is 2” to 4”. Zone 4
AGASTACHE SUNRISE®
Sunrise® Agastache flower continuously from early spring until autumn frost. This series was bred for color intensity and strong branching. Sunrise® offer great heat and drought tolerance. Perfect in both perennial and annual mixed containers. Agastache Sunrise® are among the greatest of all pollinator plants. A must have for all perennial programs. Garden height is 18” to 24”. Zone 5

BUDDLEJA LEAH®
Massive flowering spikes on this daylength neutral series clearly shines for year round sales. This five color series show intensified color through the season. Strong basal branching on these compact selections allows for sales in containers as small as a quart in full flower. The series uniformity can translate into stunning three color mixes. Garden height is 20” to 24”. Zone 5
**COREOPSIS REINA®**
The Reina® is clearly regal in its performance. With extremely large semi-double blossoms, Reina® looks easily at home in a perennial garden or in a mixed combination. The Giant Gold shows off the largest flowers of all coreopsis. Daylength neutrality in both of the Reina® allows for year long sales with an extremely quick finish time. Garden height is 12” to 15”. Zone 5

**DIANTHUS CONSTANT BEAUTY®**
Constant Beauty® flower ‘constantly’ even in the warmest summer conditions. These beauties have double flowers and delightfully subtle fragrance. Strong landscape performance and full color range make these a standard for all dianthus programs. The Constant Beauty® Crush selections dazzle with their delicious bicolor blossoms. Mixed containers are only limited by your imagination as they will all perform with a uniform habit. Garden height is 6” to 10”. Zone 4
**Dianthus Constant Cadence®**

Dianthus Cadence are another easy to program First Light® Perennials from Green Fuse®. This uniform series of fully double flowers deliver a pot carnation look with landscape vigor. Milk Cherry, Peach Milk and the Potpourri give combination color as the flowers go through many shades as they harden. Potpourri has been a hit for both growers and consumers! Garden height is 6” to 8”. Zone 4

**Gaillardia Lunar®**

Gaillardia Lunar® are sturdy garden performers even in the most arid of climates. Their massive flowers are early to bloom and sit tightly on top of their well-rounded habit. Tightly packed internodes have strong resistance to splitting as the flowers develop. They are excellent in our Perennial Compatibles® mixes. Garden height is 6” to 10”. Zone 5
**GAURA BANTAM**

Gaura Bantam® have compact flower stems and a mounded plant shape. Bantam® will flower easily under short days, hitting the early spring market. Bantam® Iris Pink will delight all consumers with its striking variegation and deep rose blossoms. Garden height is 10” to 14”. Zone 5

**HOSTA OLD YELLER®**

An all NEW high vigor hosta supplied via Tissue Culture. Old Yeller® produces an aggressive habit on large deep golden leaves. This zone 4 perennial will hold its golden color all season long resisting the summer fade of the traditional hosta. Garden height is 18” to 24”. Garden width is 24” to 30”. Zone 4
Green Fuse® was extremely proud to bring another industry first to the market, the Hydrangea Game Changer® series. The first and only hydrangea in the world to not only be daylength neutral, but the Game Changer® series requires zero chilling! This removes twenty-four to thirty weeks of production time. The massive lace-cap flowers will bloom continuously from spring through frost. The remarkable hardiness will make this a standard in perennial gardens throughout the world! The pot crop performance of the series has repositioned traditional Christmas and Easter sales genera. Garden height is 20” to 24”. Zone 5
LAVENDER DENTATA PARIS® BLUE

Paris® Blue boasts an incredibly heavy branched habit, easily setting itself apart from the traditional Dentata. This bred habit allows for three to four times the blooms, while behaving perfectly in high density container production. Garden height is 12” to 15”. Zone 7

LAVENDER STOECHAS LAVISH®

The Lavish® series is yet another breakthrough breeding program. Lavish® have compound flower heads that produce ridiculous amounts of beautiful bracts. The abundance of thick, false flowers brings retail hold capabilities for weeks. Among the earliest of all lavender to flower, Lavish® may hit the market early and will continually bloom for months. Garden height is 12” to 18”. Zone 7

Utility Patent Number iUS9,301,4631B1

LAVENDER STOECHAS NEW MADRID®

New Madrid® series has been improved with selection for market leading earliness to flower and plant uniformity across the series. The New Madrid® have larger flowers and larger bracts. The New Madrid® series easily sets the standard for all Spanish lavender. The standout of Star Purple is another first with its clean star shaped pattern. Garden height is 12” to 18”. Zone 7

Madrid® Magnum Purple is a large growing Lavender stoechas selection, ideal for 2 gallon production. The Madrid® Magnum flowers produce an abundance of massive colorful bracts, resulting in a stunning display. Garden height is 15” to 20”. Zone 7
DARLING DAISY®
Leucanthemum Darling Daisy® has a short stature and a small, pure white daisy flower. Darling Daisy® are continuous flowering, so they are easy to finish for early sales. Perfect for quarts and gallon containers. Garden height is 6" to 8". Zone 6

DOUBLE DARLING DAISY®
With a fully double flower and compact habit, Double Darling Daisy® is positioning itself as a crowd favorite. The snowball shaped flowers sit cleanly on this day length neutral selection for a tidy appearance throughout the entire growing season. Garden height is 8" to 10". Zone 5

DARLING DAISY® SUPREME
It is easy to see the supremacy of Darling Daisy® Supreme! With industry exclusive breeding program to develop multiple flowering branches along the same stem, Darling Supreme® rarely cycles out of color. This is a clear advancement for all leucanthemum breeding. Garden height is 12" to 15". Zone 3

ANGEL DAISY®
Angel Daisy® is so early to flower, it makes production planning a snap. Angel Daisy® has anemone flowers that transition to pure white. Excellent for containers or as a mixed element. Garden height is 8" to 12". Zone 4
DOUBLE ANGEL DAISY®
The Double Angel Daisy® throws a massive number of fully double flowers all season long. With a habit matching the industry leading Angel Daisy® perfectly, Double Angel Daisy® will boast the same finishing time and garden performance with a unique flower formation. Garden Height 8" to 12". Zone 4

WHITE MOUNTAIN®
White Mountain® is also day length neutral. White Mountain® boasts large blooms on stout plants and can be programmed to flower for retail sales from early spring to well into fall. Ideal for larger container, White Mountain® is the flag ship of the Green Fuse® Botanicals Leucanthemum program. Garden height is 18" to 24". Zone 4

WHISKER® WHITE
A complete reinvention of the "crazy daisy" type of shasta. Whisker® White is completely day length neutral and requires zero cooling hours to bloom. This is scheduling ease for all growers. Its massive five to six inch flowers will continue in the garden all growing season. Garden height is 15" to 18". Zone 4

BETSY™
Betsy™ is the world’s largest flowering day length neutral shasta daisy. With flower sizes of 5” to 8” Betsy™ will blow you away! Thick petals translate into a single flower holding beautifully on the plant for multiple weeks. Geared for 1.5 gallon to 2 gallon production, Betsy’s™ robust stature will impress! Garden height is 18” to 20”. Zone 4
LUPINE STAIRCASE®

The Lupine Staircase® Series is the pure definition of First Light® Perennials. Able to flower under any day length without the need for vernalization. Let the growing temperature dictate your finish date, not the plant requirements. They will also continue to produce impressive flower displays until the heat of summer. Once the night time temperatures cool, the Staircase® series will come back into their glory. This also allows for a fantastic new fall crop. The clean look of the all NEW White delivers a stately appearance for North American gardens. The Staircase® Series allows any grower to become a lupine grower! Garden height is 18” to 24”, Zone 3.
**MONARDA MARJE®**

Marje® will require long days like other monarda, but unlike other monarda, Marje® has incredible resiliency to mildew. Its compact habit becomes loaded with unusually large blossoms through the summer and into the fall. Garden height is 12” to 15”. Zone 4

**RUDBECKIA DAKOTA®**

A revolutionary breeding program brings the industry first truly zone hardy Rudbeckia Hirta. The Dakota® series is completely day length neutral, so the spring perennial market is just as easily achieved as the summer. Dakota® Gold throws massive rich gold flowers measuring five to seven inches across, while Red Shield highlights deep fall color tones. The Double Gold and Flame throw impressive texture and color. The Dakota® Rudbeckia is a must have for all perennial growers. Garden height 15” to 18”. Zone 5
**SALVIA SWIFTY®**

Salvia nemorosa Swifty® is early flowering and delivers more flower spikes on a compact plant frame. Garden performance is absolutely outstanding as they resist foliage disease common to other nemorosa. Garden height is 10” to 15”. Zone 3

This breeding program required an all new classification in nemorosa, Multiflora. Salvia Swifty® Multiflora stay compact, even after repeated flowering. These selections will never stretch in the container or the garden. Strong basal branching produces dozens of beautiful flower spikes per plant. Garden height is 6” to 10”. Zone 3

---

**SCABIOSA GIGA®**

Scabiosa Giga® Blue showcase exceptionally large flowers with excellent garden performance. Giga® Silver may have more traditional sized scabiosa flowers, but in a very untraditional, massive quantity. The recent introductions of Pink and Deep Ocean maintain the large, recognizable flower of the Giga®. All are day length neutral and require zero cold treatments. These larger framed plants fill containers quickly and can be programmed to meet a spring through summer or fall sales schedule. Garden height is 16” to 20”. Zone 4
SOLIDAGO SPARK PLUG® NEW
An all NEW breeding program brings the first ever truly day length neutral Solidago. For the first time ever, Solidago may color your garden all season and not just late summer like traditional selections. Spark Plug® will maintain an extremely compact habit and flower continuously all growing season. No cooling or long days are needed to produce exceptional quality plants. Garden height is 15” to 18”. Garden width is 12” to 15”. Zone 5

VERONICA VERNIQUE®
The Veronica Vernique® is first year flowering and its day length neutrality means it can be scheduled to finish from early spring through fall. The color intensity of the entire series grabs retail attention. Vernique® are a uniform, compact series of plants and with seven colors creates endless gardening and mixed container possibilities. The Vernique® series is a must have for both annual and perennial growers. Garden height is 10” to 14”. Zone 4
